You May Suffering From SLEEP APNEA

Sleep Apnea

- Sleep Apnea is breathing that stops during sleep.
- The problem can be mild or severe, based on how often your lungs don't get enough air.
- Sleep apnea can cause you to snore loudly.
- People with sleep apnea often have sleep problems and are tired during the day.
- One of The two main types of sleep apnea is Obstructive Sleep Apnea (OSA), caused by blocked airways.
- Our machines help persons who are suffering from OSA breathe more easily during sleep by increasing air pressure in the throat so that airway doesn't collapse while breathing.
